

One Car Garage – 23075

Our Seattle customer came by our Lynnwood office with a specific goal in mind, which was to build a two car Craftsman Gable garage to match the style of his house.

In addition, to duplicate the look and feel of his house, he chose the 18" eave and gable overhangs with attractive enclosed Town & Country® soffits with vented white vinyl. And like his building, each standard Craftsman Gable is complete with a corner bird box enclosure on the overhangs.

For his garage door he picked a carriage house steel roll up with Stockton lites for greater indoor lighting. This durable door is hot-dipped galvanized steel secured to heavy duty 20 gauge pre-painted stiles. It included toggle locks, a bottom weather seal, vinyl stops along sides and top as well as four decorative hinges with two decorative handles to choose from.
