

## Warehouse -21225

At PermaBilt®, having been in business since 1973 with over 20,000 plus buildings constructed, we've seen just about every size, shape and configuration. But when the Tulalip Tribes came to us to build a maintenance building over 400 feet long this certainly was a very unique opportunity to build something special.

The building was subdivided into three main sections as we worked with other contractors to make sure the building was constructed on time and on budget so the customer could complete the interior work in a timely manner. And like the other buildings we've erected for the Tulalip Tribes, PermaBilt® prides itself on the quality and craftsmanship that goes into every building.

Once completed, our customers appreciated how we worked with them from initial concept to final phase of construction. They could tell time and effort were built into the building. See additional details on the following page.

## Warehouse -21225 - Continued
