

Garage - 21370

Our customer from Marysville had a collection of classic and sports cars plus a couple of RVs that he wanted stored in one building. Unlike most garages, his vision of a garage was 120 feet, long enough to accommodate all his vehicles with plenty of room for more.

In meeting with his PermaBilt® Building Representative, they went over a variety of designs until he was satisfied with location, layout, color and building details. Due to the size of the building, it presented some unique permitting challenges but we worked with the customer until it was approved.

Once we began construction of the building, we had it completed just 2 months later – thanks to our experienced crews and dry summer weather with loads of daylight.

As you can see from the treasures inside this building, the customer put it to good use in no time.
