

## Garage & Shop - 22343

Needing a small garage to complement their manufactured home, our Hansville customer came to PermaBilt® having read we have been in the post frame construction business since 1973. Although he had spoken with other post frame builders, he was pleased with the time the PermaBilt® Representative spent with him at his property going over the use and design of his building.

When going over the preliminary design of their building, our Hansville customer checked off key accessories he wanted with his garage like 18" eave and gable overhangs. And to enhance the appearance of his overhang he opted for the attractive, enclosed Town & Country® vented vinyl soffits.

When it was erected, the owner was very happy with quality and personal care that went into the building. What he had expected and more.
