

True Gambrel Garage and Shop - 22366

There are so many different options when developing a garage and shop. One of our customers' favorite designs is a true gambrel, a classic design that allows for an expansive second floor. In this case, our Lake Stevens client wanted considerable space upstairs for a hobby room. Down below, he wanted room for a workshop and storage for his car, bikes, lawn mower and sport vehicles.

The unique design accommodated not only the customer's need for space, but integrated nicely onto their beautifully landscaped property.
