

## Garage/Shop - 22591

Our Snohomish customers wanted a building to house their RV and cars that had a barn-like charm to complement their beautiful new home and property.

He called us prior to closing on his new house so that he could get the ball rolling on his new building. PermaBilt®'s Building Representative met with the customer numerous times in order to make sure that they had it just right. They added several accessories that were both practical and unique to customize their building. For instance, they chose a carriage house door for their motorhome, roof prows, and cupolas with rooster weathervanes.

When it was completed, they expressed their pleasure in the welcome addition to their property and have already contacted us about another building on another piece of property.
