

Garage and Storage - 23688

Like so many homeowners, over time they can quickly overwhelm their garages. Before they know it, they desperately need a new garage especially to park any sporting vehicles. So when our Bothell customer came to us needing a garage (with additional storage space) to park his boat, he looked at PermaBilt® as a possibility. When he met his PermaBilt® Building Representative, they worked on the design which not only had to have plenty of storage room but needed to match his house. Hearing that we have been in business since 1973 and having built over 21 million square feet, our Bothell customer felt comfortable in picking us to do the job.

The customer added a shingled gable treatment to provide some additional flair and to match the style of his house.

Once the site was leveled, our crew came in to start construction. And like every building, it was constructed with nothing but quality in mind. Once his garage was built, our customer couldn't wait to move his boat inside before the bad weather hit.

Details:
