

## Commercial Building - 23779

A Commercial company's owners needed to have a warehouse with office space built to house their equipment and store their inventory. Going to PermaBilt® and working with our Building Representative, they had a good idea of what type of design they wanted. They worked with the Building Representative to create the unique design to fit their particular needs as well as meet the conditions of their building site. There were 3 meetings between with the customer to pin down the accessories and numerous details. As is evident from the photos, this was a well thought out design specifically to meet the needs of the customer.

Our permit department obtained the permit without issue. The customer then prepared his building pad and we ordered building materials and scheduled our building crew.

Once the concrete was poured and finished, the owners were excited about having the warehouse they needed to help continue to grow their business.

### Details:
