

## Monitor Garage - 22037

Monitor-styled buildings are usually designed for barns but many of our customers really like its classic design. So it came as no surprise to their PermaBilt® Building Representative, when an Edmonds couple were looking to build a monitor-style garage with woodshop, especially since it would look so nice on their property. This building is nestled in a suburban rather than rural neighborhood, but the design seamlessly blends into the beautifully wooded lot.

And that's what PermaBilt® prides itself on, putting into each building something that is unique to you. We'll build to accommodate your needs. Our construction crew is company-employed and trained. From beginning to final completion, worker safety, cleanliness and thoroughness are part of PermaBilt®'s priorities. Such as the monitor-styled garage, our experienced professionals will work with your design till you are happy. And having worked for decades on permitting, we are confident in getting the necessary paperwork completed to start construction.

In the end, our Edmonds customers watched as their new garage with woodshop was effortlessly built exactly to their specifications.
