

## Arcadia Drilling-24282, 24283, 24284

The owner of this company previously had a garage built by PermaBilt® at his residence. When he decided to sell the land his business was on and build a new facility at the Port of Shelton, he contacted PermaBilt® to help design and build 3 buildings to meet their company's needs. We designed and built an office building that the customer finished on the interior and added rock accessories to the front. We also built a Monitor style building with a 16' tall garage door in the center bay to accommodate the company's trucks. The third building was an open sided storage building with 5 bays to protect trucks and equipment from the elements.
