

## Dual Use Shop-24319

This building was designed to meet the needs of a growing wheatgrass business. They not only needed a room for dry storage and office space for their business, but also a personal area to store and work on boats. The two-tone siding selection was a great way to divide the spaces for visitors. The building features an off center peak with an eave height of 14' on one side and 8'8" on the other.
