

High/Low Garage and Shop- 24603

Moving from Ballard to Arlington, this customer was excited to utilize his new property to build his dream 40'x60' shop. He was familiar with PermaBilt® and our work so called us to work on designs while he was working on securing his property. The final design included a 40'x60' footprint along with a 30'x40' second floor with an exterior staircase, really maximizing the space. Due to the property characteristics, the permit process included some challenges, but our permit department worked to get the requirements met and the building built. In the end, the customer was thrilled with the new building on his beautiful 4-1/2 acre lot.
