

Monitor Style Garage-24291

This customer, based in Kent, had some challenges finding a place to build on his property due to the location of a well on his property and the radius around it that had to be preserved per the county's requirements. Thankfully he had nearly 3 acres of property available and found an ideal spot for his new building. He went on to work with a PermaBilt® building representative to design a red Monitor style building that fits seamlessly on his property and provides plenty of space for car and equipment storage.
