

2 Car Garage & Shop - 24379

This customer purchased property and wanted to build a garage and barn at the same time she built her house. She worked with her architect and our Building Representative in tandem. She had always wanted a garage with a steep roof pitch so she chose a 9/12 roof pitch. She worked for a construction company and knew she wanted to supply her own wood garage doors and wanted to go with the corrugated galvanized siding. The result looks modern, rustic and traditional all at once.
