

Board & Batten Barn w/ Loft - 25214

This Maple Falls customer wanted a post frame building to store his cars and toys with a loft to house his office space and he wanted it to match the look of the rest of the farm buildings on his 14 acre farm. With Board and Batten siding, Split Sliding doors on each end, Cupola vents, and a Straight Prow, the building looks like a pole barn with a hay loft. The many windows in the loft let in a lot of natural light and make this the perfect building to work from while still being on the farm.
