

Farm Equipment Storage Building – 25326

Quite often PermaBilt® is asked to construct a second building for a previous customer that will complement the first building . Our Poulsbo customer had just purchased a horse barn for his new horse farm and he needed a farm equipment storage building that would meet his current as well as future needs. Using the same color scheme and dual Cupolas vents makes this addition fit right in with the horse barn and gives him the room he needs for now as well as the future.

Farm Equipment Storage Building
