

Museum Sequim 24613

The Sequim Museum & Arts Center needed a new home. Our PermaBilt® Building Representative spent many hours with the representative from the Museum's board working out a design that would work for their new building in downtown Sequim. After a few design iterations, they were ready to forward with the build.

This building consisted of variety of accessories to complete a handsome building. Adding to the buildings appeal the customer planted foliage around the outside. We are honored to be a part of this community project and the customer was thrilled with the final results.
