

Garage and RV Storage Puyallup 25451

This customer had already secured financing and had a pretty clear idea of the type of building they wanted to store their RV and some vehicles on their 4 ½ acre property along the Puyallup River. They evaluated a variety of layouts and concepts which they proposed to our PermaBilt® Building Representative

They had numerous meetings with our PermaBilt® Building Representative in order to get the design and the size pinned down precisely to what would work for his property layout. The customers found a monthly special on our website that met all their needs which is what they ultimately decided on. Once complete we had yet another very happy customer who could finally get their RV out of the Northwest weather.
