

Garage and RV Shop Sequim 25895

This customer needed a building to store vehicles and a travel trailer, and they wanted extra space for a workshop. After meeting with their PermaBilt® Building Representative they decided on this great design. The customer wanted a large 12x12 roll up door on one of the openings to ensure easy access for the travel trailer as well as a 12x10 roll up door to ensure access for all other vehicles. The PermaBilt® Building Representative also helped the customer match the siding color and garage door design to their home. Once completed, the customer was very happy to have a shop that matched their home as well as a place to store their vehicles and trailers.
