

## Garage and Barn Sequim Olympia 26444

This customer needed a building that would serve as a combination between a garage and horse barn. After meeting with their PermaBilt® Building Representative they decided on this great design. The customer wanted the barn look as well as the functionality of a garage. The PermaBilt® Building Representative also helped the customer match the sliding color and garage door design to their home. Once completed, the customer was very happy to have a building that matched their home as well as a place to house their horses and shop space.
