Monitor Building - 22558

At PermaBilt®, we have constructed practically every size and shape building—
customizing to the needs and wants of our many customers. This was especially true when a Washougal resident came to us wanting to construct a unique building for his family. This included a full-length basketball court, a full-sized pool, fitness room, showers, recreation room, kitchen and 2 bedrooms. We first did an engineering contract in order to provide the customer the most cost effective structure possible.

The sports building, sized 104’ x 60’ x 10’ & 26’, located on acreage in Washougal, was erected using a monitor barn design with no less than 45 windows to allow for plenty of light and ventilation. The cedar log, light stone, taupe and forest green colors blended in nicely with its surrounding environment. Inside, the mono trusses overlooking the pool added a nice organic look and feel.
