Horse Barn – 25325

Our Poulsbo customer just purchased a nice piece of land for his horse farm and he needed both a horse barn that would meet his current as well as future needs. So when our he talked about building horse barn, our PermaBilt® Building Representative asked plenty of questions about size, layout, location, number of stalls, budget, doors, ventilation, etc. to make sure every aspect was covered.

With a new horse farm and uncertainty about how big the big would grow in the future, our customer wanted to learn more about our PermaStall®. This system is assembled quickly with many quality features. It is strong, flexible, and most importantly for the horses, safe. And with its attractive powder coated steel construction, horse owners do not have to worry about rust, corrosion, cribbing and kicking. Each stall comes with an optional removable stall divider for foaling, and each stall is complete with a grilled front and optional grill stall dividers, so important for protecting the horses from each other but still allowing socialization with owner and fellow horse. With 4’ x 8’ grilled sliding doors for interior passage, our customer felt comfortable with the layout. Adding a 100# loft with L-Shaped stairs for feed storage completed the barn.

Horse Barn Details:
