

True Gambrel Garage/Shop - 26686

Our customers in Monroe came to us needing to build a new pole building to house their tractor, boat, and a classical car they own. Once we met with the customers, the gambrel style buildings immediately caught their attention for that classic barn look. We designed this beautiful 28'x36' True Gambrel pole barn with a lean-to for their tractor and other farm equipment that can be left outside. To keep the classic barn look, we used two sliding doors on one end, and two roll up garage doors on the other to give them the functionality of a garage. We also built a full second floor and staircase for the customers to use as an extra storage space, or future living space. As you can see in the photos below, this beautiful pole barn adds a charm to this already great property and we are excited for our customers to enjoy their new pole building for years to come.
