Pole Building Shop with Living Space - 26811

This Mason County customer owned a beautiful piece of property up on the mountain side in Shelton, overlooking the Hood Canal. They contacted us looking to construct a pole building that they could turn into their cabin. We designed this 28'x36'x12 pole barn with two 10'x36' lean-tos on either side. As shown in the photos above, we also built out two 5' full roof prows on each gable end to give the building some unique aesthetic appeal. The standout feature of this pole building is the custom windows that open up to that amazing view!
