GARAGE & SHOP – Job #26887

Our customer on Whidbey Island wanted to add a small workshop to their property with enough space to also store a few vehicles. They worked with one of our PermaBilt® Building Representatives to design a 30'x30'x10' pole building that fit their needs perfectly. To bring in natural light, they added three 4'x2' windows on each side of the building, along with a 4'x4' window in the back. One of the best features is the set of custom cedar panel garage doors the customer chose. These doors match the enclosed cedar soffits and were picked specifically to go with the look of their home. The finished building looks great and gives the customer plenty of space to work on projects, store vehicles, and enjoy a building that fits right in with the rest of their property.
