Pole Building Garage w/ loft – Gig Harbor - 26705

We recently built this custom 36’×48’×12’ garage for our customers in Gig Harbor, WA, designed in collaboration with them to bring their ideal shop to life. Every detail was planned to fit how they wanted to work, store, and enjoy the space. Inside, a 20’×24’ loft adds a second level of usable space, giving them plenty of room for storage without crowding the main floor. The wood and glass-pane garage doors really set this project apart, bringing in a warm, finished look that pairs well with the overall design. This build is a great example of turning a customer’s ideas into a functional, well-built shop that’s both practical and visually impressive.
